Version 1.0.9 (Release Date: 11/12/2012)

Version content

Functionality / use case	Comments
	<p>This release includes the implementation of the change requests generated during the UAT. These are:</p> <ul style="list-style-type: none">- The creation of a web client testing account is not mandatory any more.- Simplification of the content layout of the email sent to gateway support, in order to make it compatible with the INFRA application ui.- The pdf form is not attached to the initial email sent to the user. It is only attached to the activation emails.- For the gateway to gateway accounts, the latest guidelines for connecting to the EMA gateway have been added.- The document store path is defined based on the routing id and not on the user id.- Addition of extra button to generate the pdf report from the admin console.- Addition of a button to generate an email list of all the applicants.- Added number of results and pagination in the table displaying the applicants.- A template of the filename that should be used for the submissions has been added in the account activation email.- General look and feel changes.

Additional information

None

Version 1.0.5 (Release Date: 19/11/2012)

Version content

Functionality / use case	Comments
	This hotfix addresses a critical issue which made the test routing id to be replaced by the production routing id when the application for registration data was updated by the admin console. Also, it addresses the issue of a wrong value in the pdf report.

Issues fixed for this version

id	Comment
emea00028813	Web Trader Administration: Updating Technical Details. User noticed that when an administrator tries to update the Production Routing ID of an eSubmission registration account detail. When the user clicks the update button, both the Testing and production routing ID are updated with the same data entered in the Production Routing ID.
emea00028812	Web Trader Registration: Incorrect Production details The following data is not correct. 1) Document: ESubmission application details Section : The Details for eSubmission web client Field : Production, UserID
