2.2.1. THIS APPLICATION CONCERNS	9
2.2.2. Application for a change to your existing marketing authorisation leading to an extension as referred to in Annex I of Commission Regulation (EC) no. 1234/2008, or any national legislation, where applicable?	14
2.2.3. THIS APPLICATION IS SUBMITTED IN ACCORDANCE WITH THE FOLLOWING ARTICLE IN DIRECTIVE 2001/82/EC	16
2.2.4. MRL status (only for food producing species).....	43
2.2.5. Consideration of this application is also requested under the following article in Directive 2001/82/EC or Regulation (EC) no. 726/2004	46
2.3. MARKETING AUTHORISATION APPLICATION PARTICULARS	47
2.3.1. NAME(S), ATC VET CODE AND TARGET SPECIES	48
2.3.2. STRENGTH, PHARMACEUTICAL FORM, ROUTE OF ADMINISTRATION, CONTAINER AND PACK SIZES	49
2.3.3. LEGAL STATUS.....	52
2.3.4. MARKETING AUTHORISATION HOLDER/ CONTACT PERSONS/ COMPANY	57
2.3.5. MANUFACTURERS	66
2.3.6. QUALITATIVE AND QUANTITATIVE COMPOSITION.....	85
2.4. SCIENTIFIC ADVICE	90
2.5. OTHER MARKETING AUTHORISATION APPLICATIONS	91
2.5.1. FOR NATIONAL/MRP/DCP APPLICATIONS, PLEASE COMPLETE THE FOLLOWING IN ACCORDANCE WITH ARTICLE 12(1) OF DIRECTIVE 2001/82/EC	92
2.5.2. Marketing authorisation applications for the same product in the EEA (same qualitative and quantitative composition in active substance(s) and having the same pharmaceutical form from applicants belonging to the same mother company or group of companies or which are "licensees").	94
2.5.3. FOR MULTIPLE APPLICATIONS OF THE SAME VETERINARY MEDICINAL PRODUCT ...	96
2.5.4. Marketing authorisation applications for the same product outside the EEA (i.e. From applicants belonging to the same mother company or group of companies or which are "licensees". Same qualitative and quantitative composition in active substance(s) and having the same pharmaceutical form).	97
2.6. ANNEXED DOCUMENTS (WHERE APPROPRIATE)	99
3. About this Document	101
3.1. Definitions, Acronyms, and Abbreviations	101
3.1.1. Acronyms	101

1. Introduction

1.1. How to read this document

In association with this document the **maa_vet_schema.xsd** file contains the XML schema file that provides a description of the structure of all the concepts used for this annex. This will enable you to construct a data extraction/generation script to populate the relevant information to/from your systems. This schema file can be found on the esubmissions website under the eAF page at the following link:
<http://esubmission.ema.europa.eu/eaf/index.html>

The "Chapters" refer to the paragraph number of the paper application form. The "Sections" refer to the paragraph numbering of this document.

Some diagrams are too large to describe the whole hierarchy on only one page. Therefore, the diagrams are split in sub sections that might not be in line with the paper document chapters.

In order to find your way back in this document when starting from paper document refer to the chapters' labels and numbering.

The information provided in this document focuses only on the initial veterinary application form information and how it is mapped with the DES 3.0 standard.

Description and definition of the DES 3.0 Concepts used in this document can be found in the DES 3.0 Technical Guide document. This again can be found on the esubmissions website under the eAF page.

1.2. Sections Components

Each section is split in three components that show different aspects of the DES 3.0 standard applied to the application form.

1.2.1. The Elements Mapping Table

This table describes the mapping between the paper form fields of a specific chapter and the elements of the DES 3.0 Model.

The table consists in 4 columns:

- **Element Id:** The id of the field used in business rules. <paragraph>-<numeric order>
Ex: 264-1
- **Label:** The label of the field in the application form is sometimes preceded by a chapter numbering.
- **DES 3.0 Mapping:** It is the corresponding mapped-to element in the DES 3.0 model. It contains at least one mapped-to element. The mapping shows the hierarchy from the root element to the leaf element with the parent-child link represented by the "/" sign.
- **RDM Mapping:** It is the corresponding mapped-to attribute in the RDM Model. The mapping shows how to get the information in the RDM relational model through links between the technical concepts represented by the ">" sign.

The minimal notation is always "<technical concept parent>/" in the common context and "<mapped-to element>" in the DES 3.0 column.

The description of the technical concept parent is in the DES 2.0 supplementary specifications sections 7.1 and 7.2

If there is no mapping, the DES 1.0 element remains in the form specific part of the model.

- **Remarks:** Contains any relevant information concerning the element values, format or business rules.

Colours

Text: Tells that the elements are not part of the RDM 3.0 and can be found only in DES 3.0 with no similarity in terms of definition.

Text: Tells that there is no existing mapping between the DES 3.0 and RDM 3.0. The missing mapping can be of two kinds.

- "ignored" based on the decision of the RDM team not to map the element
- "not mapped": The RDM 3.0 may contain more or less elements because the RDM 3.0 draft came after the DES 3.0.

Text: Tells that the RDM element is an additional linked entity comparing to the DES 3.0 hierarchy.

Note: The EUTCT controlled terms used in the RDM 3 are **not** always published yet. That's why some of the DES lists only provide a "short-name" which does not directly corresponds to a CTL term id in RDM model.

1.2.2. The Business Rules Table

All the rules are gathered with their corresponding Element Tree Diagram (ETD) and are defined as follows:

Element: The name of the element mentioned in the (ETD)

Default Cardinality: Cardinality that applies by default. It corresponds to the cardinality of the concerned element in the ETD.

Rule: Description of the condition to be evaluated.

Effect: if the condition is evaluated to true then the effect is applied.

1.2.3. The Element Tree Diagram (ETD)

The data structure constraints are captured in a graphic approach to facilitate the reading and assessment by the business.

The model used refers to the one used by W3C (World Wide Web Consortium XML Specification DTD for its publication standard issued in 1998.

The model is called "Element Tree Diagram" (ETD)

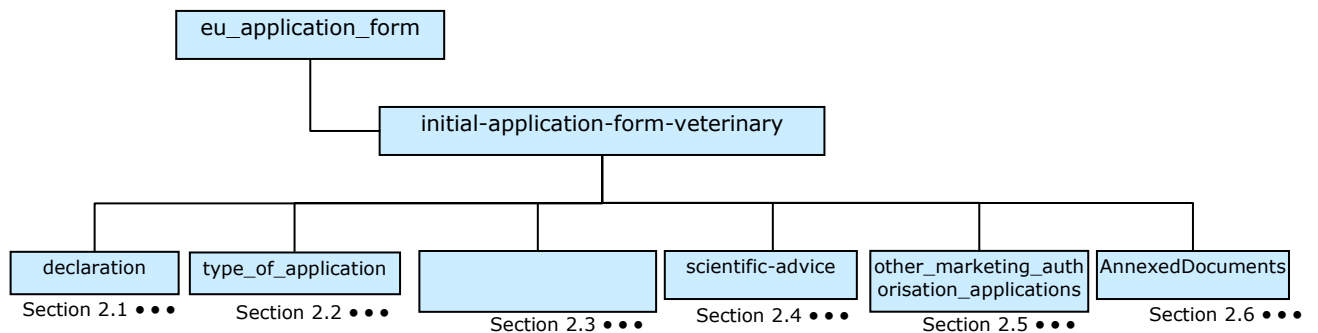

The diagrams of this version reflect the DES 3.0 standard described in the DES 3.0 Supplementary Specifications document. The ETD shows which are the concepts involved in the mapping of all the application form fields in the Element Mapping Table and the hierarchical constraints between them.

2. Initial Application form

The “initial-application-form-veterinary” is the highest level of the form specific model that represents the paper form. All sections are fully mapped to the Reference Data Model core concepts and common application form concepts.
