About this Document

This document lists and briefly describes the new features and fixed issues included in each release of the eSubmissions Web UI.

The most recent release appears first.

The known issues are categorised per component or business process of the system so that users can easily identify which issues are relevant for them. The components currently used are:

Component	Short Description
eSubmissions Web UI	The user interface (UI) used by MAHs to generate the delivery file with the metadata needed to submit and process the electronic submissions for the Human and Veterinary medicines application documentation.
eSubmission Process	The business process whereby MAHs submit electronically the application documentation to the eSub GW.
Notifications/ Acknowledgements	The functionality that sends acknowledgements to MAAs/ MAHs upon certain pre-defined events happening.
eSub GW	eSubmission Gateway

For the purpose of this document, a change request (CR) is defined as an additional functionality that was not included in the original requirements of the software.

For additional information on the PSUR Repository see:
- The eSubmission Gateway and eSubmission Web Client webpage gives access to all documentation.
- Regular training sessions are being organised. See the eSubmission Gateway and eSubmission Web Client webpage for more information.
- User guidance documentation on the eSubmission Gateway and eSubmission Web Client webpageprovides answers to most common problems.
- If you encounter any issue that is not addressed by the above, visit the EMA Service Desk portal: https://servicedesk.ema.europa.eu
