# Release Notes for the eSubmission Roadmap v2.2

## Main updates compared to version 2.1

### eCTD v4.0

The timeline has been removed and will be re-confirmed once the topic is discussed as a part of the network strategy.

### eGateway, CESP, eAF, Single Submission Portal

The stepwise deliveries towards the mandatory, fully integrated, single submission portal have been updated and more details have been included. **CESP dataset module** (formerly called CESSP) to be used for new MAA by Q2 2020 and **mandatory** use by Q1 2021. CESP dataset module for other applications by the end of 2021 and mandatory use 6 months thereafter *(CESSP phase 2 TBD).*

The date for preparation of mandatory use of an **EU single submission portal** will be decided as a part of the network strategy. Stepwise implementation of a common telematics service desk will be by Q1 2021.

### Other updates

The roadmap document version 2.2 has also been updated to reflect the already achieved milestones (Done) and a few minor changes have been made, e.g. to include some reflections on current situation and the new veterinary legislation issues.
