2.16	05/05/20	Updated to reflect addition of 'Covid-19' related flag as implemented in release v3.7.0.5	Kristiina Puusaari

1. Introduction

This document serves as a simple guide for applicants to submit applications via the eSubmission Gateway / Web Client using xml delivery files. It highlights the restrictions and conventions that users need to be aware of when generating submission and delivery files.

It also describes the existing constraints and workaround solutions to enable submissions to the agency.

The document assumes prior knowledge of the eSubmission gateway processes and will therefore focus on the process of creating delivery files to be included in the submissions.

Communication regarding the introduction of the xml delivery files for the submission process can be found from the [eSubmission website](#).

2. Scope of the eSubmission Gateway xml delivery file system

The use of xml delivery files is mandatory for all human and veterinary domain submissions to EMA for which the relevant delivery files are available. Use of filenames conventions is no longer allowed. Use of the xml delivery files requires inclusion of the delivery file in the submission package. When the **xml delivery file** is **included** in the package, **the filenames conventions are no longer checked** and a simple, meaningful name should be given to the submission zip folder.

There is an intention to integrate the Formatted Table Template into the XML delivery file and number of fields familiar from the formatted table template should now be filled in in the XML delivery file user interface. This is the first phase of the integration of the new fields into the XML delivery file and it does not affect the use of the Formatted Table Template.

The xml delivery files can currently be used for the following **submission types**:

Human

Submission Type	Description
annual-reassessment	Annual Re-assessment
clin-data-pub-fv	Clinical data for publication – Final version
clin-data-pub-rp	Clinical data for publication – Redacted Proposal
extension	Extension
lifting-suspension	Lifting of suspension
maa	Marketing Authorisation Application
notification-61-3	Notification Art. 61(3)
pam-anx	Condition of a marketing authorisation granted for a medicinal product, listed in Annex II of the MA
pam-capa	Corrective Action/Preventative Action related to a post-authorisation measure
pam-leg	Legally binding measure related to a post-authorisation measures

pam-mea	Additional pharmacovigilance activity in the risk-management plan related to a post-authorisation measure (RMP) (e.g. interim results of imposed/non-imposed interventional/non-interventional clinical or non-clinical studies)
pam-p46	Paediatric submissions related to a post-authorisation measure
pam-paes	Submission of post-authorisation efficacy study
pam-rec	Recommendation related to a post-authorisation measures e.g. quality improvement related to a post-authorisation measure
pam-sda	Cumulative review following a request originating from a PSUR or a signal evaluation related to a post-authorisation measure
pam-sob	Specific obligation related to a post-authorisation measure
pass107n	Submission of a post authorisation safety study protocol (according article 107n) – NAPs
Pass107o	Submission of an amended post authorisation safety study protocol (according article 107o) – CAPs and NAPs
pass107q	Submission of a post authorisation safety study report (according article 107q) – NAPs
reformat/baseline	Reformat of dossier*
renewal	Renewal
rmp	Risk Management Plan (RMP)
transfer-ma	Transfer of a marketing authorisation
usr	Urgent Safety Restriction (USR)
var-type1a	Type IA variation (single and IG)
var-type1ain	Type IA _{IN} variation (single and IG)
var-type1b	Type IB variation (single and WS)
var-type2	Type II variation (single and WS)
withdrawal	Withdrawal
Referrals	
• Article5(3)	Referral under Article 5(3)
• Article13	Referral under Article 13
• Article16C1C	Referral under Article 16c (1c)i
• Article16C4	Referral under Article 16c(4)
• Article20	Referral under Article 20
• Article29(4)	Referral under Article 29(4)
• Article30	Referral under Article 30

• Article31	Referral under Article 31
• Article35	Referral under Article 35
• Article107i	Referral under Article 107i
• Article29PAED	Referral under Article 29 paediatric
asmf	Active Substance Master File (ASMF)
pmf	Plasma Master File (PMF)
article-58-WHO	Periodic Safety Update Report (PSUR) which should only be used for products authorised under Art. 58 (WHO)
psur/psusa	Periodic Safety Update Report (PSUR) which should only be used for PSURs outside of the PSUSA / PSUR single assessment procedure. This selection will take the user automatically to the PSUR Repository user interface.
Paediatric Submission	Paediatric submissions (can be used for all paediatric submissions e.g. pips, modifications, waivers, responses, requests for modification, requests for compliance checks and annual reports n deferrals)
signal detection	Signal Detection submissions for Nationally Authorised Products (NAPs) with EPITT number

* In the exceptional case of reformatting the application no regulatory activity (submission type) is allowed. Therefore, 'none' must be stated (in the eCTD envelope). The submission application unit will identify the sub-activity related to the product. In the submission description some information can be provided to e.g. highlight specific modules being reformatted. The delivery file user interface will show value 'none' as reformat/baseline for usability reasons. The eCTD envelope should contain value 'none'.

Veterinary

Submission Type	Description
annual-reassessment	Annual Re-assessment
article-45	Procedure under Article 45 of Regulation (EC) No 726/2004, initiated by the European Commission and Member States in parallel to a referral for products of the same active substance or therapeutic class, for veterinary medicinal products authorised through the centralised procedure which cannot be included in referral procedures
extension	Extension
lifting-suspension	Lifting of suspension
maa	Marketing Authorisation Application
pam-anx	Condition of a marketing authorisation granted for a medicinal product, listed in Annex II of the MA

pam-leg	Legal requirement related to an authorised medicinal product
pam-mea	Additional pharmacovigilance activity in the risk-management plan (RMP) related to an authorised medicinal product (e.g. interim results of imposed/non-imposed interventional/non-interventional clinical or non-clinical studies)
pam-rec	Recommendation related to an authorised medicinal product (e.g. quality improvement)
pam-sda	Cumulative review following a request originating from a PSUR or a signal evaluation related to a medicinal product
pam-sob	Specific obligation related to an authorised medicinal product
pass	Post-authorisation safety study
reformat/baseline	Reformat of dossier taking place outside of any regulatory procedure
renewal	Renewal
rmp	Risk Management Plan (RMP)
transfer-ma	Transfer of a marketing authorisation
var-type1a	Type IA variation (single and IG)
var-type1ain	Type IA _{IN} variation (single and IG)
var-type1b	Type IB variation (single and WS)
var-type2	Type II variation (single and WS)
withdrawal	Withdrawal of a marketing authorisation in full or in part
referrals	
• Article13	Referral under Article 13 of Regulation (EC) No 1234/2008
• Article30(3)	Referral under Article 30(3) Regulation (EC) No 726/2004
• Article33(4)	Referral under Article 33(4) of Directive 2001/82/EC
• Article34	Referral under Article 34 of Directive 2001/82/EC
• Article35	Referral under Article 35 of Directive 2001/82/EC
• Article78	Referral under Article 78 of Directive 2001/82/EC
mrl-extension	Extension of a Maximum Residue Limit
mrl-extrapolation	Extrapolation of a Maximum Residue Limit
mrl-full	Full Maximum Residue Limit application
mrl-modification	Modification of a Maximum Residue Limit
asmf	Active Substance Master File (ASMF)
vet-psur	PSURs for veterinary products

The **submission-unit** is an attribute introduced in the EU Module 1 Specification v.3.0. The concept of submission unit has been additionally implemented for veterinary submissions for reasons above, even though these are not submitted in eCTD format.

The following submission unit values may be used:

initial	Initial submission to start any regulatory activity
validation-response	For rectifying business validation issues
response	Submission unit type that contains the response to any kind of question*, out-standing information requested by the agency * Use this unit for responses to Lists of Questions and Lists of Outstanding Issues, Requests for Supplementary Information, etc.
additional-info	Other additional information (could include, for example, missing files) and should only be used, if validation-response or response is not suitable
closing	Submission unit type that provides the final documents in the centralised procedure following the decision of the European Commission
consolidating	This submission unit type should also be used when consolidating the dossier in as a result of withdrawing or rejecting a single regulatory activity (not in case of the withdrawal of the entire application/marketing authorisation). This submission unit is not available for veterinary submissions.
Corrigendum	Correction to the published annexes in the centralised procedure (usually shortly after approval)
reformat	Intended to support the reformatting of an existing submission application from any format to eCTD*, i.e. a baseline eCTD submission containing no content change and which will not be subject to review (see example below). This type will always be used together with the submission type 'none' * For veterinary submission the reformat may apply to historical non-VneeS dossiers which need to be converted to VneeS format. In the exceptional case of reformatting the application no regulatory activity (submission type) is allowed. Therefore, 'none' must be stated. The submission unit will identify the sub-activity related to the product. In the submission description some information can be provided to e.g. highlight specific modules being reformatted. The delivery file user interface will show value 'none' as reformat/baseline for usability reasons. The eCTD envelope should contain value 'none' for submission type and 'reformat' for submission unit.

The **submission description** is an attribute introduced in the XML delivery file to provide more details on the type of response provided.

The following submission description values may be used for both, human and veterinary submissions:

Responses to RSI	Responses for Request for supplementary information used for all post-authorisation activities (automatically selected for relevant post-authorisation submissions).
List of Questions	Response to List of Questions (MAA or extension only)
List of Outstanding Issues	Response to List of Outstanding Issues (MAA or extension only)

3. The submission process

Submission via the eSubmission Gateway using xml delivery files is a 2 step task:

- 1 Create a delivery file for your submission by navigating to [the eSubmission website XML delivery file preparation screen](#). The link to the delivery file creation screen is available on the navigation panel on the left hand side of the screen. See Create delivery file screen section.

eSubmission Gateway and eSubmission Web Client

The eSubmission Gateway and the eSubmission Gateway Web Client are electronic submission channels that allow the applicants to submit doc veterinary medicines to the Agency securely over the internet in structured and non-structured formats. The web-based Gateway Web Client may be available for all applicants. The Gateway and the Web Client users will benefit from an automated confirmation of the technical validation fee system. The use of the eSubmission Gateway and the Web Client is mandatory for all human and veterinary submissions.

It is mandatory to use XML delivery files for submissions via the eSubmission Gateway and the Web Client.

News
09-10-2019

Formatted Table Template implementation in the XML delivery files

An updated version of the eSubmission Gateway XML delivery file user interface is now available.

Following this release the use of the Formatted Letter Template will become obsolete as of 1st January 2020. This will concern all EMA Human & Veterinary submissions. From 1 January 2020, the Formatted Letter Template will no longer be maintained by EMA and the document and references removed from EMA's Common Repository. The use of XML delivery files will also support EMA internal processes by significantly reduce the time required for receiving continuous and immediate access to up-to-date dossiers.

Users are required to fill in all the submissions attributes correctly through eSubmission Web UI by creating an XML delivery file since all attributes will be validated against the Common Repository. The use of XML delivery files will also support EMA internal processes by significantly reduce the time required for receiving continuous and immediate access to up-to-date dossiers.

- 2 Add the delivery file to the top-level folder of your document package and submit this document package via eSubmissions Gateway / [Web Client](#). See [eSubmission Gateway website](#) for detailed guidance on how to register and how to use the eSubmission Gateway and the Web Client.

Note: The filenames conventions are no longer used and **cannot** be **validated** when a **delivery file** is **included** in the submission and hence a **simple, meaningful** filename may be given to the submission package when delivery files are used. It is important to note that special characters or dash (-) should not be used in filenames.

Important note:

If submission covers any **duplicate** products, groupings or worksharing submissions a **separate delivery file needs to be created and attached to each submission**. For example: you are submitting a worksharing variation application for product A and product B which are both managed using a **separate** eCTD product lifecycles. A separate submission is required for **each product** to ensure continuity of the eCTD lifecycle and a separate delivery file and a separate submission must be prepared for both products.

The above requirement does not apply to veterinary (VneeS) grouping, worksharing, referral and PSUR submissions.

4. Create delivery file screen – Centralised Procedure including ancillary medicinal products in medical devices

Each delivery file that is generated will have a unique name consisting of word 'delivery' with 9 or 10 digit number, for example 'delivery_435108440'. The delivery file can be renamed, however it must contain word 'delivery' as the first word and special or non-latin characters must not be used as these may lead to failure of the submission.

For Human procedures, the required submission format is eCTD (mandatory for all centrally authorised, DCP, MRP and nationally authorised (NP) products). More information on the mandatory use of eCTD please see eSubmission website.

Note: Applicants are reminded that eAFs should be edited and signed using Adobe Reader. Using Adobe Acrobat Pro may lead to rejection of the submission. More information can be found in the eAF website.

Human **Veterinary**

Choose a submission type:* Nothing selected

Choose a Submission-Unit* No selection

Mode:* Single Product

*Denotes mandatory fields

Generate delivery file **Reset form**

The user will be required to complete all mandatory fields in each section. Ensure you always **first** select the appropriate domain for your submission (**human** or **veterinary**). This will determine which options are required to be selected for the given type of submission.

4.1. Create delivery file

Step	Description	Notes
1	<p>Human submissions:</p> <p>Select regulatory activity from the list provided under the "Choose a submissions type" heading. The regulatory activities available reflect the updated EU M1 3.0.3.</p> <p>Veterinary submissions:</p> <p>Click on the 'Veterinary' button to enter the veterinary submissions domain. Select regulatory activity from the list provided under the "Choose a submissions type" heading. This will call out a set of further fields appropriate for completion for that submission type. The regulatory activities available cover procedure types handled by the EMA. All veterinary submissions, including Maximum Residue Limit (MRL) and veterinary PSUR submissions should be sent using the xml delivery file.</p>	<p>Additional submission types, outside the EU M1 specification, covering EMA business processes are listed under submission type.</p>
2	<p>Submission unit:</p> <p>Select the relevant 'Submission-Unit' for your submission.</p>	<p>Submission unit type describes the content at a lower level (a "sub-activity") which is submitted in relation to a defined regulatory activity.</p>
3	<p>Submission description</p> <p>For Centralised Procedure submissions, when submission-unit 'Response' is selected the attribute submission description should be selected for extension and MAA applications. This mandatory field will provide further details on the type of response selected. The user should select List of Questions or List of Outstanding Issues as relevant.</p> <p>When submission unit consolidation is selected, it is possible to indicate if the procedure includes a withdrawal. For extension and variation procedures it is possible to indicate if the withdrawal is for partial or for the whole procedure. For all other submission types option 'procedure' is automatically selected when withdrawal is indicated.</p> <p>For both Human & Veterinary submissions:</p> <p>When a marketing authorisation application (maa) submission is selected as submission type and the submission unit is a response then the user must indicate if the response contains request for change of applicant. If so, the relevant docs should be included as part of the submission (e.g. new electronic Application Form).</p>	<p>The submission description is automatically filled in for relevant post-authorisation procedures.</p>
4	<p>For Human domain only:</p> <p>For Type 2 variations, Extensions and MAA submissions a new radio button has been implemented to flag if the submission is 'Covid-19' related.</p>	<p>The selection is defaulted to option 'No'. If your submission is Covid-19 related, please ensure that you tick 'Yes'.</p>

Choose a submission type:*

var-type2

Choose a Submission-Unit*

initial

Mode:*

Single Product

Covid19 related: * ☒ Yes ☐ No

5

Human domain:

For Centralised Procedure human submissions, the Product type and the submission format cannot be changed and must always be 'Centralised' and 'eCTD'. Submissions for Nationally Authorised Products that may be included for example in a referral procedure it is possible to change the product type and submission format to 'National' and 'NeeS' or 'Other' as applicable.

Enter the submission eCTD or NeeS sequence number. For eCTD format submissions this number should always be the next sequential number in the product lifecycle.

If a failure Acknowledgement is received, the same sequence number should be used unless the error relates to the sequence number itself.

For initial MAA submissions the sequence number is normally 0000.

To allow for easy cross referencing of related submissions; Users can optionally enter a related sequence number.

Veterinary domain:

In veterinary submissions, the Product type is by default set to "Centralised" and cannot be changed (with the exception of worksharing and referral submissions).

For Centralised Procedure veterinary submissions, the Submission format can be selected from the following options: "VNeeS (pharmaceutical product <version>)", "VNeeS (immunological product <version>)" or "Other". For MAA submissions, option "Other" cannot be used.

For example, "VNeeS (pharmaceutical product v2.6)" means the structure follows the [Guideline on eSubmission for Veterinary products - version 2.6](#), TABLE 1: Folder structure and Standard files for an electronic application for a pharmaceutical product. "VNeeS (immunological product v2.6)" means the structure follows the [Guideline on eSubmission for Veterinary products - version 2.6](#), TABLE 2: Folder structure and Standard files for an electronic application for an immunological product.

The sequence number is always a numeric value (range from 0000 to 9999).

More information on the related sequences can be found from the [Harmonised technical eCTD guidance](#).

If CTD is used as the format of part II (Quality) of a VMP dossier, the submission format to select is "VNeeS".

As format requirements evolve over time in line with the EU Telematics eSubmissions Roadmap for use of VNeeS, applicants should always consult the [Veterinary eSubmissions Website](#) for current guidance on the mandatory or recommended format for their submission type.

If the submission relates to an ASMF in CTD format, select "Other".

5

Depending on the submission type the information required is different.

Human domain:

For initial MAA submission; start typing in the 'Select

The EMA product number is

<p>product' field the product name or any part of the product number in format H0001234</p> <p>For ancillary medical products in medical device; start typing in the 'Select product' field the product name or any part of the product number in format H000123 for initial MAA submission and indicate using the tick box if the product is an ancillary medical product in medical device.</p> <p>Is this ancillary device: <input checked="" type="checkbox"/></p> <p>For any subsequent submissions of medical devices, you can search the product by name or typing H/D.</p> <p>For any other post-authorisation activity; start typing in the 'Select product' field the product name or any part of the product number in format H/C, H/D or H/W. Alternatively, you can simply enter the product number without the prefix letters.</p> <p>For human submissions, the Product type and the submission format cannot be changed and must always be 'Centralised' and 'eCTD'.</p> <p>Enter the submission eCTD sequence number. This number should always be the next sequential number in the product lifecycle.</p> <p>It is possible to enter the sequence number of any related sequence to cross reference related submissions. For 'initial' and 'reformat' submissions the related sequence number should be the same as the sequence number. For all other submission units, the related sequence should be different (smaller) than the sequence number.</p> <p>Users should indicate if a Risk Management Plan (RMP) is included and if yes, the RMP number should be provided for the following submission types:</p> <ul style="list-style-type: none"> • MAA • Extension • Renewal • Variation Type IA • Variation Type IAIN • Variation Type IB • Variation Type II • PAM <p>For all post authorisation CAP submissions when the submission unit is closing and the closing sequence relates to multiple different procedures; users can add multiple procedure numbers from a predefined list to reference the submission by using 'Add related procedure' field.</p> <p>For variations Type IB and Type II it is possible to indicate the names of other CAPs for which the same changes are being applied in a separate submission. The names of these products are entered using a free text field.</p> <p>For initial renewal submissions the MAH should select the renewal type by indicating the length of the requested renewal – conditional 1 year renewal or 5 year renewal.</p> <p>For human 'pam' (except pam-capa) and pass 107n, pass</p>	<p>available on the Eligibility confirmation letter as 'Product Reference'. The Eligibility Confirmation Letter indicates Product number e.g. H0002271 or V0001234.</p> <p>This Product Number (or Product Reference) remains the same throughout the product lifecycle and it should be used regardless what type of submission is being transmitted.</p> <p>Product numbers start H/C for human CAPs. If your product is authorised under article 58 (WHO) you can filter by typing H/W.</p> <p>If the product is ancillary medicinal product, you can filter by typing H/D. The submission format is automatically changed to 'other' when medical device is selected.</p> <p>The sequence number is always a numeric value (range from 0000 to 9999).</p>
--	---

107q and pass 107q submissions an additional attribute 'Pam Code' must be selected. The Pam code is a mandatory field with a dropdown list of relevant codes.

Human and Veterinary domains:

It is now mandatory to indicate if the submission contains a Brexit related procedure. This is applicable for initial submissions for the following submission types:

- Variations Type IA (H&V)
- Variations Type IA_{IN} (H&V)
- Variations Type IB (H&V)
- Variations Type II (H&V)
- Transfer MA (H&V)
- Notification 61-3 (H only)

Veterinary domain:

For initial MAA submission; start typing in the 'Select product' field **any** part of the product number in format 001234 (see Example: Veterinary Initial MAA below). For any post-authorisation activity; start typing in the 'Select product' field the product name or **any** part of the product number (see Example: Veterinary Extension below).

Product names are not shown for veterinary submissions prior to the initial application for data protection.

Product numbers for veterinary CAPs in post-submission start with EMEA/V/C and are one digit shorter but the number is retained for the product in question.

The EMA product number is available on the Eligibility confirmation letter as 'Product Reference'. The Eligibility Confirmation Letter indicates Product number e.g. H0002271 or V0001234.

Example: Human Type IA variation – **grouping of multiple scopes** affecting a **single product***

In the case that the grouping variation concerns a single product, the eCTD envelope 'Mode' is 'Grouping' and the XML delivery file 'Mode' is 'Single Product'.

In case of submission unit 'initial' is used it is now possible to indicate that multiple scopes are included – this is done by ticking the 'Grouping (more than one scope)' checkbox.

The screenshot displays the EMA submission form for a Human Type IA variation. At the top, there are three mandatory fields: 'Choose a submission type:' with a dropdown menu showing 'var-type1a', 'Choose a Submission-Unit:' with a dropdown menu showing 'initial', and 'Mode:' with a dropdown menu showing 'Single Product'. Below these fields is a note: '*Denotes mandatory fields'. The main section is titled 'Submission: var-type1a'. It contains several fields: 'Product Type:' with a dropdown menu showing 'Centralised', 'Submission format:' with a dropdown menu showing 'eCTD', 'Sequence number:' with a text input field showing '0025', and 'Related sequence:' with a text input field showing '0025'. Below these are 'RMP included:' with a toggle switch set to 'Yes', 'Brexid related procedure:' with radio buttons for 'Yes' and 'No' (selected), and 'RMP version Number' with a text input field showing '10.2'. At the bottom, there is a 'Select a Product:' field with a dropdown menu showing 'Umbipro (TM)-EMA/H/W/003799'. Below this field, the following information is displayed: 'Product EMA number: EMA/H/W/003799', 'Product short name: Umbipro (TM)', 'ATC Code: D08AC02', 'INN: CHLORHEXIDINE DIGLUCONATE (20% SOLUTION)', and 'MAH: GlaxoSmithKline Trading Services Limited'. At the very bottom, there is a checkbox labeled 'Grouping (more than one scope):' which is checked.

In case the submission unit is '**responses**' submission description 'Responses to RSI' is automatically selected. The Mode should remain 'single product'.

A procedure number should be selected from list of procedure numbers for post-authorisation procedures. The procedure number can only be selected for subsequent submissions after the initial sequence. The procedure number is selected – if available - from the list of available procedure numbers, the numbers listed depend on the submission type. This number is provided to you at the time of the start of the procedure. In case the correct procedure number **is not found** from the list, please **contact PA-BUS** or **leave the field empty** .

When multiple scopes are included in a single variation, it is indicated with G at the end of the procedure number.

If you are not able to find the correct procedure number from the list. Please contact the PA-BUS (PA-BUS@ema.europa.eu).

It is recommended to 'Reset' the form before creating a new delivery file using different submission type.

4.2. Create delivery file for IG variation submission

Step	Description	Notes
1	<p>Select 'var-type1a' or 'var-type1ain' from the regulatory activities list (submission type). Select the relevant 'submission unit' from the list. Select the correct mode: IG (Grouping of variations)</p> <p>The Agency will allocate a 'high-level' cross-products IG procedure number, which will be used for the handling of procedures which affect more than one medicinal product. A procedure code (abbreviation) is used for such groups of Type IA/ IA_{IN} variations i.e. "IG". As the 'high-level' number cannot be allocated to one single product, the procedure number will therefore contain "xxxx" as a place-holder for the product number. Example: EMEA/H/C/xxxx/IG/002.</p>	<p>This 'high-level' procedure number can be obtained from the Agency shortly before submission by sending your request with a copy of the draft cover letter to: PA-BUS@ema.europa.eu or vet.applications@ema.europa.eu.</p> <p>Note that IG variations are those that affect more than one MA.</p> <p>If your variation is a grouping</p>

Step	Description	Notes
	<p>Note: For grouping of several different changes affecting the same product – select 'Single Product' in the XML delivery file and 'Grouping' in the eCTD envelope. This leads to a difference in the eCTD envelope and in the XML delivery file which is acceptable as the 'Mode' is used for different purpose in the eCTD envelope and in the XML delivery file.</p> <p>Please note that requesting this high level number in advance is mandatory since this number must be included in the xml delivery file.</p>	<p>of several type IA changes but affects a single product, do not select the IG option. Leave the 'Mode' as Single (as this is referring to a single product). Please note that in the eCTD envelope mode value 'Grouping' should be selected for 'Grouped variations'.</p> <p>More information on 'Grouping of variations' can be found from the Regulatory Post-Authorisation Guide (choose either 'human' or 'veterinary' tabs).</p>

Select WS/IG number:*

6	Click 'Generate delivery file' and save the delivery file on your computer.	The delivery file should not be amended or re-named.
---	---	--

4.6. Create delivery file for PAM (Post-Authorisation Measure) submission for Centrally Authorised Products (human only)

Step	Description	Notes
1	Select pam type (ANX, LEG, MEA, P46, REC, SDA, SOB) from the regulatory activities list (submission type) in line with the instructions provided in the PAM Submission form Select the 'submission-unit' from the list. This should in most cases be 'initial' or 'response'.	Submission unitConsolidatingis now available for PAM submissions.

Choose a submission type:*

pam-leg ▼

pam

CAP

pam-anx

pam-capa

pam-leg

pam-mea

pam-p46

pam-paes

pam-rec

pam-sda

pam-sob

2	As PAM submissions refer to Centrally Authorised products, the Product type 'Centralised' is selected automatically from the dropdown menu.	
3	The Submission Format is automatically selected as 'eCTD'	

Product Type:*

Centralised ▼

Submission format:*

eCTD ▼

4	Enter the submission eCTD sequence number. This number should always be the next sequential number in the product lifecycle. Optionally enter any related sequence number to cross reference related submissions.	The sequence number is always a numeric value (range from 0000 to 9999)
5	Select the relevant 'PAM code' as provided in the PAM Submission Form Please note: the PAM submission form should be provided within the eCTD submission package in the same folder as the cover letter (EU M1 section 1.0)	PAM submission form is available here . More information on the use of PAM submission form can be found from the Post-Authorisation Guidance on PAMs – See ' How should I structure my PAM submission dossier '.

Select Pam Code:*

12	If the referral procedure is fee related, please tick the box 'Is this fee related?' to expand the section. Please provide the EMA SAP Customer number and an optional Customer Reference number if available for example a Purchase Order number	
<div> <div> <input checked="" type="checkbox"/> Is this fee related ? </div> <div> Customer number* ⓘ 0000600101 </div> <div> Customer reference ⓘ Enter customer reference </div> </div>		
13	Click 'Generate delivery file' and save the delivery file on your computer.	The delivery file should not be amended or re-named.

5.3. Create delivery file for Referrals reviewed by the CVMP¹ for Centrally or Nationally Authorised Products

Step	Description	Notes
1	Click on the 'Veterinary' button to enter the vet submissions domain. Select Submission type 'referrals'. Select the 'submission-unit' from the list. Select relevant submission-unit e.g. response. The submission mode is disabled and shows always 'Single product.'	In most cases, the first referral package submitted by a MAH is a response to a referral list of questions. For this purpose submission-unit 'response' should be used.
<div> <div> Human Veterinary </div> <div> Choose a submission type:* referrals Choose a Submission-Unit* initial Mode:* Single Product </div> </div>		
1.1	If submission unit is "response", then indicate the type of response by selecting a value from the submission description	

¹ Committee for Medicinal Products for Veterinary Use. For more information concerning referrals reviewed by the CVMP, see the [Veterinary Regulatory Referral Guide](#).

2 Select Referral Article from the dropdown list.

The system shall only allow selection of a Product Type that is relevant for the selected Referral Article as follows:

- Article 13 -> National (only)
- Article 30(3)-> Centralised or National
- Article 33(4) -> National (only)
- Article 34 -> National (only)
- Article 35 -> National (only)
- Article 78 -> National (only)

Note that Article 45 procedure submissions should now be submitted following the steps described in point 4.1.1. Create delivery file.

3 Select Product type from the dropdown list in accordance with the status of the product to which your submission relates. This can either be 'Centralised' or 'National'.

Please note that for multiple product submissions you will not be able to change the mode 'single product'. The submission will be accepted despite this limitation.

4 Select Submission format from the dropdown. This can either be 'VNeS' or 'Other'.

If CTD is used for part II of a VMP dossier, the submission format to select is "VNeS".

--	--	--

Submission: referrals

Referrals Article *	Product Type: *	Submission format: *

5	In the Referral field, enter the specific referral number assigned to this procedure. This is a 3 digit number in format: EMEA-V-A-123.	Enter the three digits in the number field.
6	In the Product/referral name field, enter the specific name assigned to this procedure. This name can be found on the letter from the Agency regarding the Start of the procedure and a List of Questions (eg. 'VMPs for pigs containing zinc oxide').	Enter the product or referral name in the free text field.
7	In the MAH Name field enter the name of the marketing authorisation holder of the product to which the submission relates.	Enter the MAH name in the free text field.

Referral:*	EMEA-V-A-123
EMA Referral Number: EMEA-V-A-123	
Product/referral name:*	VMPs for pigs containing zinc oxide
MAH Name:*	VetCompany Ltd

8	Confirm the details are correct. Click 'Generate delivery file' and save the delivery file on your computer.	The delivery file should not be amended or re-named.
---	--	--

6. Create delivery file screen PSUR (Periodic Safety Update Report)

6.1. Create delivery file for human PSUR submissions

Note: Please note that all Human PSUR submissions, included in the EU PSUR Single Assessment (PSUSA) or outside the single assessment (non-EU PSUR single assessment) should be submitted to the PSUR Repository. The only exception to this is PSURs for products authorised under Art. 58 (WHO). For PSUR submissions for product authorised under Article 58 (WHO) follow instructions in section 4. Create delivery file scree Centralised Procedure.

For all other PSUR/PSUSA submissions for Human products, select PSUR/PSUSA from the dropdown menu and the system automatically takes the user to the XML delivery file creation screen for PSUR submissions (for submissions to the PSUR Repository). More information on the Human PSUR/PSUSA submissions can be found from the [PSUR Repository website](#).

6.2. Create delivery file for veterinary PSUR submissions

Step	Description	Notes
1.	Select Domain 'Veterinary'	
		
2.	Select Submission type 'vet-PSUR'	
		
3.	Select relevant Submission-Unit in accordance with the definitions given on page 9 and 10 of this document. Note that not all types of submission-unit may be applicable to PSURs and hence some will have been disabled and cannot be used.	<p>Submission-unit 'initial' should be used in case of submitting a particular PSUR to the Agency for the first time. For responses, select 'response'.</p> <p>In case the submission unit is 'response' submission description 'Responses to RSI' is automatically selected.</p>

EU/ASMF/00032-CINACALCET

EU/ASMF/00068-DAPTOMYCIN

EU/ASMF/00053-DIMETHYL FUMARATE

EU/ASMF/00048-EDOTREOTIDE

ASMF Manual field entry:

Select ASMF:*

Enter ASMF number(format EMEA/ASMF/XXXXX or EU/ASMF/XXXX)

Please tick this box if you cannot find the ASMF number from the dropdown list and wish to manually enter the ASMF number. Please ensure the number adheres to the correct format - EMEA/ASMF/XXXXX or EU/ASMF/XXXXX ☒

ASMF number:

Substance name:

- 6 Search for the product by typing any part of the product name or EMEA product number in the 'Select product' field. The more you type the more the list is filtered.
- For veterinary ASMFs supporting an initial MA application,

Enter the name of the CAP for Single or 'lead' CAP for procedure that contains multiple CAPs or multiple CAPs and NAPs.

start typing in the 'Select product' field any part of the product number e.g. 0001234.
For Veterinary ASMF submissions the product name will not be displayed for products which have not been authorised yet.

Please note that for Veterinary ASMF submissions the product name and the substance name which is a part of the ASMF number will not be displayed for products which have not been authorised yet.

Human product selection:

Veterinary product selection for ASMF:

7 Select procedure number from predefined list.

8 Click 'Generate delivery file' and save the delivery file on your computer.

The delivery file should not be amended or re-named.

9. Create delivery file screen – PMF

9.1. Create delivery file for PMF

Step	Description	Notes
1	Select Submission type 'PMF'. Submission mode is always single product.	
<div><div>Choose a submission type:*</div><div>pmf</div></div> <div><div>Choose a Submission-Unit*</div><div>initial</div></div> <div><div>Mode:*</div><div>Single Product</div></div>		
2	Select relevant Submission-Unit	
<div><div>Choose a Submission-Unit*</div><div><div>initial</div><div>No selection</div><div>initial</div><div>validation-response</div><div>response</div><div>additional-info</div><div>closing</div><div>consolidating</div><div>corrigendum</div><div>reformat</div></div></div>		
3	The Product type and the submission format cannot be changed and must always be 'Centralised' and 'eCTD'. Enter the submission eCTD sequence number.	The sequence number is always a numeric value (range from 0000 to 9999)
<div><div>Submission: pmf</div><div><div>Product Type:*</div><div>Centralised</div></div><div><div>Submission format:*</div><div>eCTD</div></div><div><div>Sequence number: *</div><div>Enter sequence no.</div></div></div>		
4	Select the PMF procedure by typing the PMF number. The more you type the more the list is filtered.	

Select a PMF Holder:*

pmf

5 Click 'Generate delivery file' and save the delivery file on your computer.

The delivery file should not be amended or re-named.

10. Create delivery file screen – Paediatric submissions

Choose a submission type: *
 paediatric submissions ▼

Mode: *
 Single Product ▼

* Denotes mandatory fields

Submission: paediatric submissions

Pip number: *
 Enter Pip no.

10.1. Create delivery file for Paediatric submission

Step	Description	Notes
1	Select Submission type 'paediatric submissions'. Submission mode is always single product.	Paediatric submissions covers all types of paediatric submissions e.g. Paediatric Investigation Plan (PIP) submissions, waivers, deferrals and modifications.
<p>Choose a submission type: * paediatric submissions ▼</p> <p>Mode: * Single Product ▼</p>		
2	Enter the 6 digit PIP number in the free text field.	The PIP number is always a numeric value
<p>Submission: pip</p> <p>Pip number: * 123456 <input type="text"/></p>		
3	Click 'Generate delivery file' and save the delivery file on your computer.	The delivery file should not be amended or re-named.

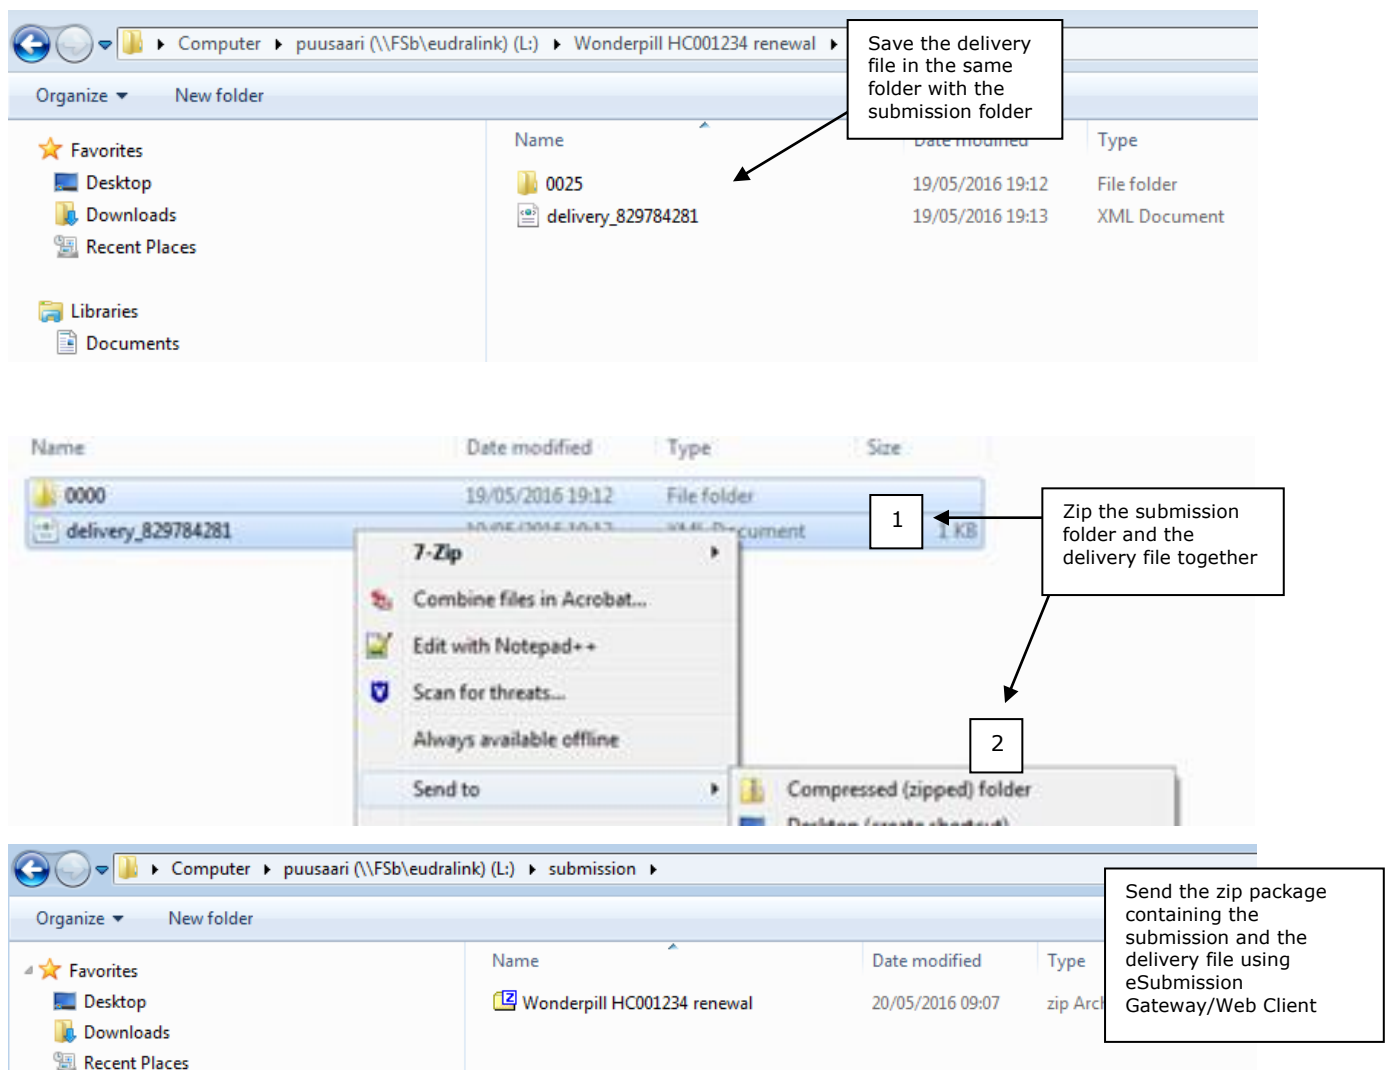

11. Saving the XML delivery file and preparing the submission package

Step	Description	Notes
1	When you have generated the delivery file it is possible to open the file to view it or to save it. The options how to open to view or save the delivery file vary depending which browser you are using	

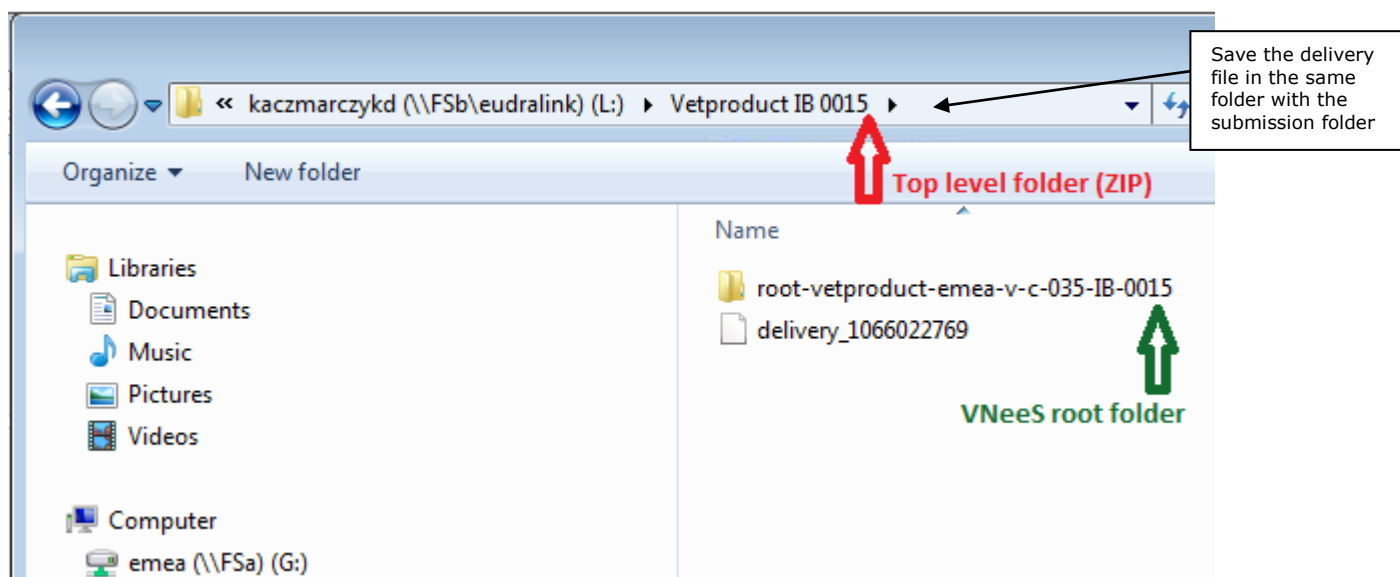

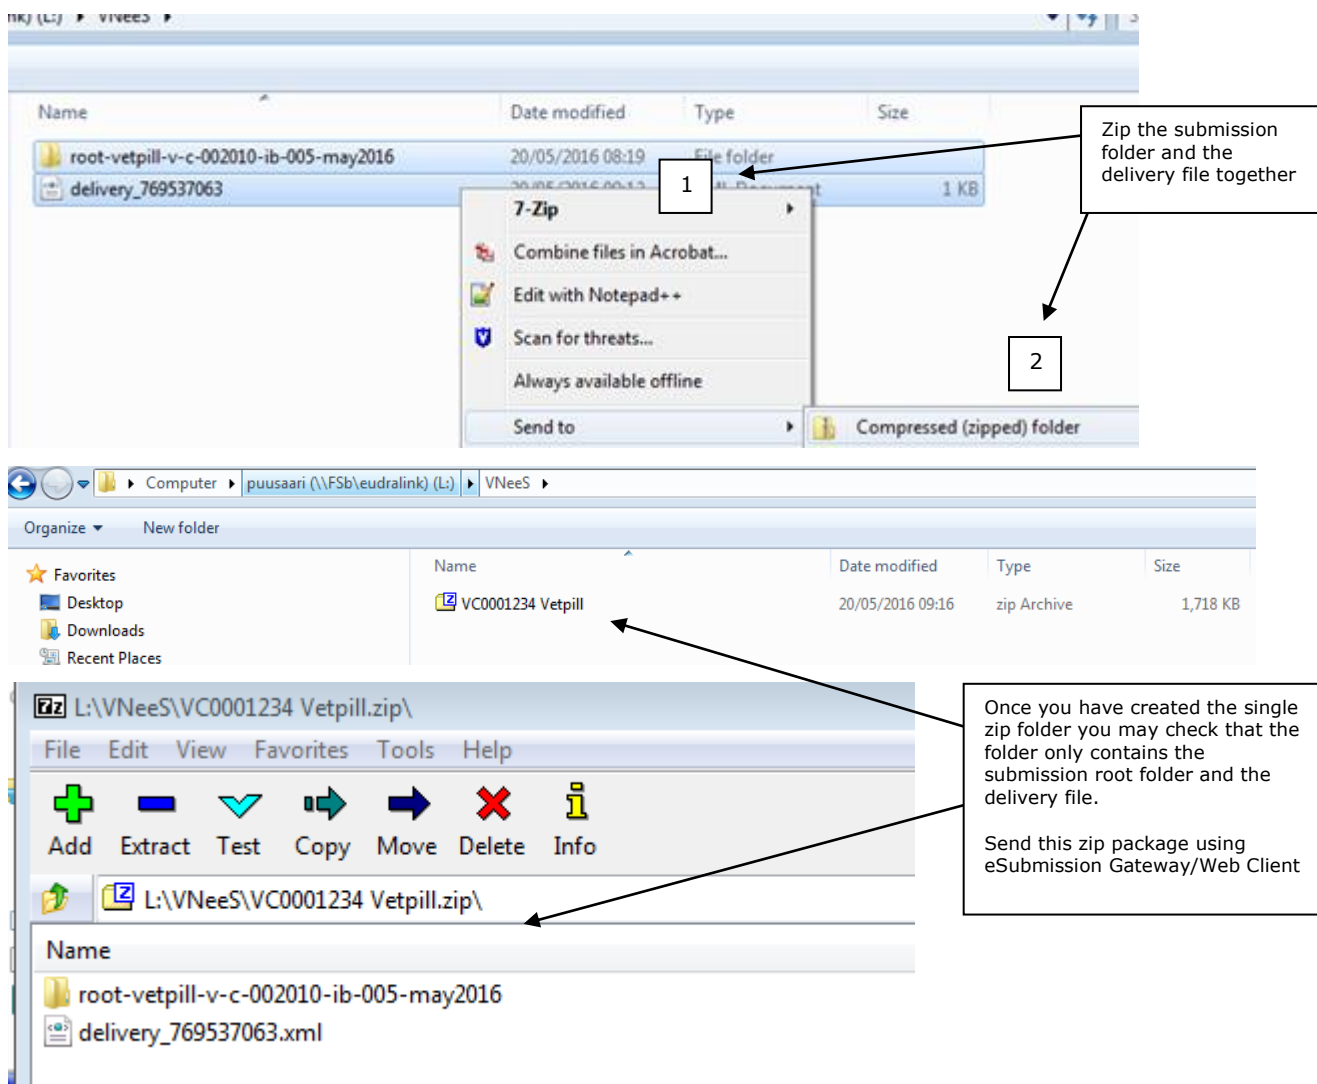

2	<p>Save the delivery file in a location where you can easily find and identify it (especially if you are creating multiple delivery files).</p> <p>It is a good practice to save the submission package in a clearly named folder. You can then easily save the xml delivery file in this same folder before zipping them together.</p>	
3	<p>The delivery file should be saved in the top level folder of the submission package.</p> <p>For human and PIP submissions this means in the same level with the submission folder.</p> <p>For veterinary submissions in VNeS, the XML delivery file should be located in a top level folder on the same level as the VNeS root folder (see example below).</p>	<p>Ensure your VNeS root is placed in a higher level folder together with the XML for easier zipping.</p> <p>Remember that the VNeS checker should be run on the VNeS root prior to zipping the root folder and the xml delivery file together.</p>

Example: Place the XML delivery file in a **human** submission

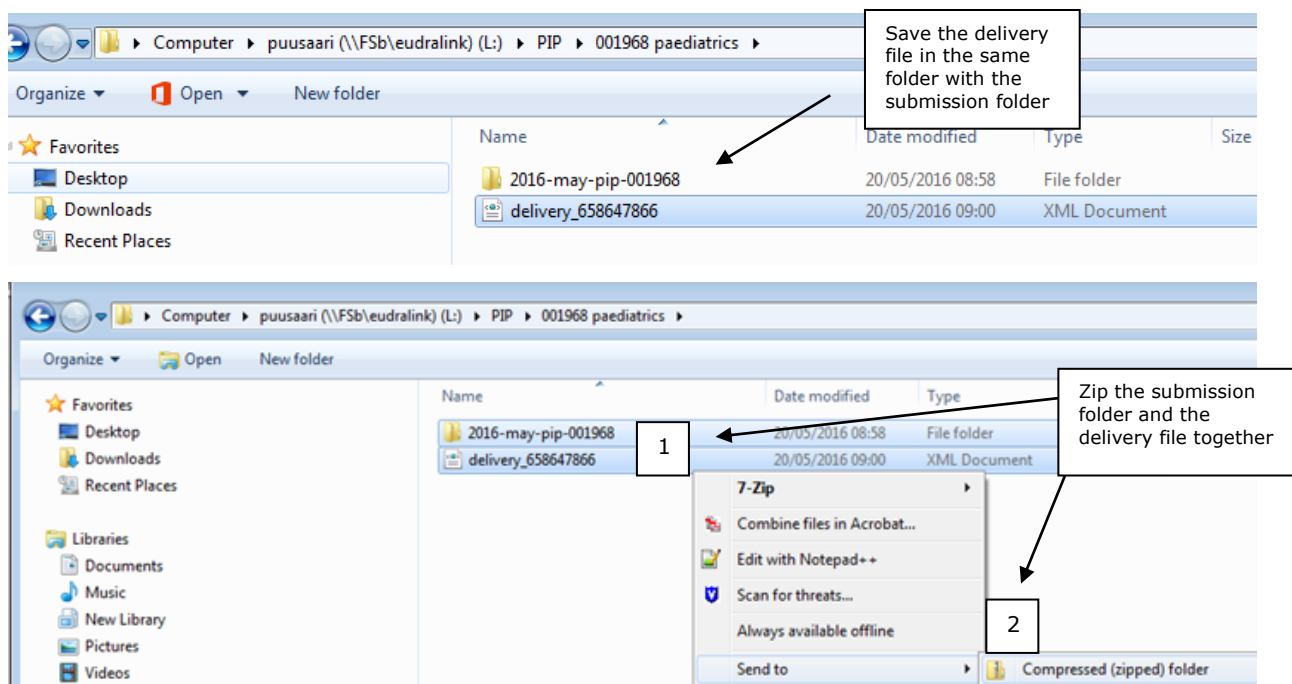

Example: Place the XML delivery file with the **Veterinary submission VNeS** root folder into a high level (zipped) folder

Example: Place the XML delivery file in a **PIP** submission

Example: Place the XML delivery file in other **non-structured** submissions

If your submission is permitted to not follow any specific electronic format such as eCTD, NeeS or vNeeS, i.e. you are submitting a loose collection of documents or a single document and you have chosen 'Other' as Submission format, make sure your documents are first placed in a folder as in the above example for PIP submission. You can name this folder in whatever manner meaningful to you. Once this is done, place the delivery file on the same level as shown above and zip the submission folder and the delivery file together in the same manner.

4	It is very important to ensure that the delivery file is in the correct level within the submission zip folder. There must be no additional empty folders i.e. the folder structure must not be superfluous. Any deviations in the location of the delivery file will lead in to failure of the submission .	
5	Log into eSubmission Gateway or the eSubmission Web Client and send the package following instructions in the user guide.	See user guide ' How to send submissions via the Web Client '

12. Issues with delivery file creation

After a new release you may experience issues due to cookies (clear the cache) to the old version. It is recommended to clear cookies and refresh the screen if any unusual behaviour is detected. For persistent issues: try 'InPrivate' or incognito browsing – open new instance Ctrl+shift+P in IE and Mozilla Firefox or Ctrl+shift+N in Google Chrome.

If you are experiencing issues with the XML delivery file screen or eSubmission Gateway/Web Client, please contact the EMA via the [service desk portal](#).
